

TORTURING DISFIGURING HUMORS

ITCHING BURNING AND SCALY ERUPTIONS OF THE SKIN SCALP AND BLOOD WITH LOSS OF HAIR

CURED BY CUTICURA

The agonizing itching and burning of the skin, as in Eczema; the frightful scaling as in psoriasis; the loss of hair and crusting of the scalp, as in scalded head; the facial disfigurement, as in pimples and ringworm; the awful suffering of infants and the anxiety of worn-out parents, as in milk crust, tetter and salt rheum—all demand a remedy of almost superhuman virtues to successfully cope with them. That CUTICURA remedies are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy have made them the standard skin cures and humor remedies of the civilized world.

Complete Treatment \$1.25

The treatment is simple, direct, agreeable and economical, and is adapted to the youngest infant, as well as adults of every age. Bathe the affected parts with hot water and CUTICURA SOAP to cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely, to allay itching, irritation and inflammation and soothe and heal, and lastly take the CUTICURA RESOLVENT to cool and cleanse the blood. This sweet and wholesome treatment affords instant relief, permits rest and sleep in the severest forms of eczema and other itching, burning and scaly humors of the skin, scalp and blood, and points to a speedy, permanent and economical cure when all other remedies and even the best physicians fail.

Millions of Women Use CUTICURA SOAP, as stated by CUTICURA OINTMENT, for beautifying the skin, for the stopping of falling hair, for softening and whitening red, rough hands, in the form of baths for annoying irritations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, for many sensitive antiseptic purposes, and for all the purposes of the toilet, bath and nursery. CUTICURA SOAP combines in ONE SOAP at ONE PRICE, viz., 25 CENTS, the BEST skin and complexion soap, and the BEST toilet and baby soap in the world.

EVEN The Courier-Journal is moved to remark that Mr. BECKHAM made a serious mistake in pardoning gambler ED. ALVEY. Br'er MARSH is still to be heard from; but Br'er DULEY will be heard from "still."

ONE of the reasons advanced by Mister BECKHAM for the pardon of gambler ALVEY was that, if gambling must exist, it is better to have "competition" in the business; and yet in another place he says he pardoned ALVEY on his promise "not to violate the law again!" If ALVEY keeps his word, it will leave WEIMHOFF in complete control of the gambling industry in Louisville, thus defeating the acting Governor's desire to encourage competition.

THE Cynthia Democrat, more power to it, appeals for the up-building of its city; and among the multitude of good advice it gives, begs the people to "lay aside small, mean politics." That's it, Br'er ALLEN. If the people of Kentucky would only learn to work at politics on election day, giving the remainder of the year to business affairs and the cultivation of friendly relations with outside capitalists who would come to the state and invest their money, Kentucky would soon take her proper place at the head of the prosperity parade.

THE YOUNGEST CONVICT.

Travis Brown, Aged 14, Serving a Life Sentence for the Murder of a Girl.

Frankfort, Ky., March 6.—Travis Brown, aged 14, is the youngest convict in the Frankfort penitentiary. He is from Clinton county, and his crime is more serious than his age would indicate. He was convicted a year ago of the crime of murder in the first degree, and for this was given a life sentence. His victim was Cella Jones, whom he had first attempted to assault. Threatened with exposure, he waylaid and shot her, killing her, to hide his crime. He was brought here and turned over to the prison officials, but apparently is too ignorant to realize the enormity of his crime or the seriousness of his present situation.

Pan-American Outlook.

The Big Exposition Promises to Exceed All Expectations.

Exhibits From All the States and Countries of the Western Hemisphere—More Than a Score of Great Buildings to Shelter the Displays.

The Pan-American Exposition at Buffalo during the summer of 1901 will be not only big, but beautiful. In many ways it will excel every similar enterprise in the history of the world, and chief among its merits will be the fact that everything can be easily seen and comprehended. System and originality are conspicuous in every detail. The revised plan shows a plot comprising 350 acres. From north to south the courts of any former exposition, and, on account of the unusual area, greater opportunity is given for elaborate and beautiful decoration.

In all the courts are to be large pools, into which beautiful cascades and wonderful fountains will throw their crystal streams. To the water features will be added the garden effects. These will comprise large sunken gardens, with formal beds of rare and beautiful

THE STATE BUILDING, PAN-AMERICAN EXPOSITION, BUFFALO, N. Y.

flowers, and many plants of a highly decorative character will be displayed throughout the courts. The grounds outside the main group of buildings are also to be richly adorned with horticultural and floral features. The horticultural exhibits, to which about seven acres are devoted in the southern part of the grounds, will contribute much to the decorative effect. In this exhibit will be over 500 beds, many of them containing hundreds of plants of a single variety of flowers.

The exterior walls of all the buildings of the Exposition are to be of staff. All cornices, corners, window openings and entrances are receiving very elaborate adornment in modeled plastic work. This ornamentation is of a far more elaborate and intricate character than heretofore used on any exposition. The roofs of all the buildings are to be of red tile, and the outer walls are to be painted in harmonious colors, giving a most pleasing effect to the eye.

This Exposition will stand pre-eminent in point of original sculpture. There will be more than 125 groups of magnificent original works by some 30 or more American sculptors of note. This grand scheme is under the personal direction of Karl Bitter, who was in charge of a similar work at the World's Columbian Exposition at Chicago.

THE PALACE OF FINE ARTS, PAN-AMERICAN EXPOSITION, BUFFALO, N. Y.

ter erected by the city of Buffalo. Crossing the bridge between the lake and the North Bay, the New York State building may be seen on the north bank of the bay. This also is of white marble, fireproof and a permanent structure. It will be devoted, after the Exposition, to the uses of the Buffalo Historical Society.

Continuing up the slight grade across the bridge, we now come to the "Approach" (D), where we get the first broad view of the wonderful group of buildings devoted to the various exhibit divisions of the Exposition.

It will be noted by reference to the ground plan that the buildings are grouped around a system of courts which have been aptly described as in the form of an inverted letter T. The transverse court, corresponding to the cross of the T, is the Esplanade, capable of accommodating 250,000 people. North of this, corresponding with the perpendicular of the T, are the Court of Fountains and the Plaza, which reach almost to the northern limits of the grounds. On either side of the Court of Fountains are the subordinate courts known as the Court of Cypress and Court of Lilies. These several courts have a combined area of 33 acres, which is far more extensive than

Owing to the nearness of Niagara Falls, with its unlimited power, the large area of the courts and the arrangement of the buildings about these courts, it has been made possible to present an electrical display far more elaborate and grand than any before conceived. Some 5,000 horsepower and more than 200,000 incandescent electric lamps will be employed in this wonderful illumination. The centerpiece of this display will be the Electric Tower, a structure of superlative beauty standing between the Plaza and the Court of Fountains. This glorious work, designed by John Galen Howard, is 375 feet high. In its southern face is a beautiful cascade, 30 feet wide and 70 feet high, falling upon a terraced base. This cascade and all the fountains of all the courts will be richly illuminated at night in a great variety of colors, giving an effect of fantastic and enchanting beauty.

Standing in the Fore Court (E) and looking north, immediately in front is the Triumphal Bridge (G). This bridge will be one of the most beautiful works of the Exposition, having four great piers surrounded and surmounted by sculptured groups modeled by Mr. Bitter and others. Crossing the bridge, we may see on the extreme right the
